RODRIGO NICOLÁS VILLARREAL

Valencia, Spain| villarrealrodrigo.n@gmail.com | LinkedIn | GitHub | Portfolio

PROFESSIONAL PROFILE

Full-Stack Software Developer with experience building B2B solutions and complete SaaS platforms. Specialized in the TypeScript ecosystem (Next.js, NestJS, Node.js) and in solving complex offline-first data synchronization, commercial, and financial challenges. Experienced across the full software development lifecycle, transforming business requirements into scalable, efficient, and maintainable architectures. Based in Valencia with full work authorization in Spain; available to start immediately.

SKILLS

- Languages: TypeScript, JavaScript, SQL, HTML, CSS.
- Frameworks: React, Next.js (15/16), Redux Toolkit, RTK Query, Tailwind CSS.
- Backend: Node.js, NestJS, Express.js, Prisma, BullMQ.
- Databases: MongoDB, PostgreSQL, Redis, IndexedDB.
- Infrastructure / DevOps: Linux (VPS), Docker, Nginx, PM2, SSL, DNS, Cloudflare R2, Git, GitHub.
- Integrations: Stripe, MercadoPago, Meta Cloud API (WhatsApp), AFIP/ARCA e-invoicing, Resend, Google Maps API

EXPERIENCE

GOURMETIFY

Founder & Lead Engineer

B2B SaaS Point-of-Sale (POS) and management platform for the food service industry. Jan 2025 – Present

- Live in production across 5 venues (including Nova Sushi's 3 locations), processing 1,000+ monthly tickets per venue.
- Built an offline-first POS with IndexedDB and background synchronization upon reconnection.
- Designed the multi-tenant architecture with Next.js 16, TypeScript and PostgreSQL, with per-tenant data isolation.
- Integrated Stripe and MercadoPago for SaaS subscriptions and in-venue payments, with webhooks handling payment states, grace periods and recurring billing with no manual intervention.
- Implemented electronic invoicing with Argentina's tax authority (AFIP/ARCA WSFE), including batch issuance and authentication token reuse.
- Deployed the entire infrastructure on a VPS from scratch: server provisioning, Nginx reverse proxy, Docker containers, Let's Encrypt SSL, domains and DNS.
- https://www.gourmetify.pro

DMA (Distribuidora Mayorista Autopiezas) / EN DIRECTO

Full-Stack Developer (Freelance) May 2024 – Sep 2026

B2B SaaS platform for wholesale distribution.

- Built the platform with Next.js 15, NestJS and MongoDB, handling catalog, orders and complex billing workflows for 520+ clients per distributor and an 11,000+ product catalog.
- Designed and implemented a payment allocation engine, including sequential document settlement, check interest amortization and refinancing plan generation.
- Built a multi-tenant architecture using feature flags and environment-based configuration, enabling white-label deployments for 2 corporate clients.
- Implemented server-state caching across 43 API slices with RTK Query and Redux Toolkit, ensuring resilient, real-time data for field sales representatives.
- Deployed the entire infrastructure on a VPS (Hostinger) from scratch: server provisioning, Nginx reverse proxy configuration, process management with PM2, SSL certificates with Let's Encrypt (Certbot), domain and DNS management, through to full-stack production release.
- DMA / EN DIRECTO

NOVA SUSHI

Co-founder & Head of Technology — Sep 2023 – Present

Sushi restaurant group in Argentina (3 locations).

- Built a custom WhatsApp inbox on the Meta Cloud API (NestJS, Next.js, Prisma, PostgreSQL) that centralizes customer service and orders for 3 locations, used daily by 7 team members.
- Processed Meta webhooks asynchronously with BullMQ and Redis queues, storing media files on Cloudflare R2.
- Designed the architecture to be multi-tenant-ready for integration as a Gourmetify module.
- Built the group's ordering website, handling 3,000 online orders per month.
- https://nova-sushi.com/

CALM ES SIMPLE

Front-End Developer – Internship — Dec 2023 – Feb 2024

- Refactored the frontend architecture by strictly applying Atomic Design principles, improving code maintainability and component reusability.
- Collaborated on UI improvements and component modularization to optimize the user experience and reduce technical debt.

EDUCATION

- UNED — Bachelor's Degree in Computer Engineering — In progress
- Henry — Full Stack Web Developer Bootcamp · 2023 — JavaScript, React, Redux, Node.js, SQL, HTML/CSS · 700+ hours of intensive training.
- Henry — Backend Upskilling: Microservices Architecture · 2023 — Microservices, Docker, MongoDB.

LANGUAGES

Spanish (native) · English — C1 Advanced (Cambridge English, exam taken October 2026, results pending)
